

Want to help your bottom line?

SDTEK provides the same expertise and capability of a full-time CIO without the overhead and benefits associated with adding another top-level executive.

Our virtual CIO (vCIO) service will become a key part of your leadership team. Our vCIO service will provide IT Strategy and critical analysis of business initiatives similar to the way you would consult a business lawyer or CPA for legal or tax advice.

Benefits of vCIO:

- Ensures IT decisions add value
- Incorporates IT into the business plan
- Provides critical review of business initiatives
- Serves as a technical member on the leadership team

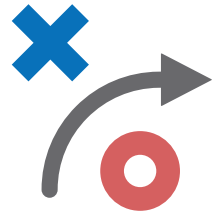

Solving Business Problems with IT Strategy

SDTEK has been helping businesses improve their bottom line through strategic IT planning and support since 2007. As we grow with our clients, we continue to fine tune our Managed Service offerings based on actual client needs.

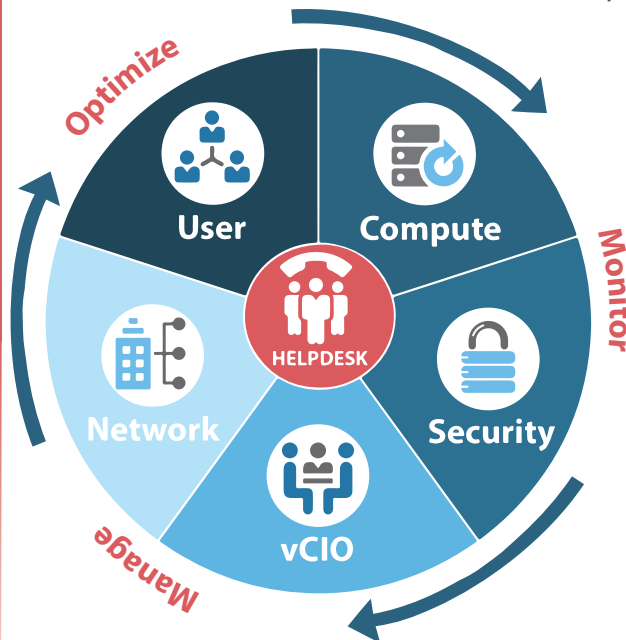

We have also developed a vast network of partnerships to leverage best in class products and services to help our clients succeed in obtaining their business goals.

Enhance Your Strategic Plan with SDTEK

Good IT strategy provides solutions for short term and long-term challenges. Additionally, the right strategy can also reduce capital expenditures and improve your bottom line. SDTEK will work with you to develop a business-aligned IT road map to:

- Reduce bottom-line expense, not just IT expenses.
- Grow your business or add a new business line.
- Enhance customer service through technology.
- Apply sound business principals to determine IT staff, supplier, software, and hardware needs.
- Develop IT strategies that are aligned to your business objectives.
- Protect your business from risk and data privacy issues.

SDTEK's Consulting Model Monitor - Optimize - Manage

As we work with clients, we educate them on our service lifecycle and why it's important to continuously work through each phase. We like to call it our Motherly or MOM approach to ensuring your business gets the tender loving care it deserves to succeed.
